Eco-responsible Biodégradable Transparent

Concevoir des produits respectueux, allier design et innovation, imaginer l'avenir ... depuis sa création, WAITING FOR THE SUN évolue dans une démarche écologique forte. En concevant notre collection de lunettes en bois, nous souhaitions donner un signal fort de cet engagement. Aujourd'hui, c'est bien plus loin que nous ambitionnons de vous emmener.

Encore plus loin, toujours plus loin ...

Parce que l'excitante quête du produit parfait nous anime chaque jour, nous avons longuement travaillé à concevoir une matière nouvelle. Nous vous la dévoilons cette saison. Son nom, le bio-acétate. Sa particularité, entièrement biodégradable, elle se recycle à l'infini.

L'innovation écologique au
cœur de notre engagement.

Sustainable
Bio-degradable,
Transparent.

Designing respectful products, combining design and innovation, imagining the future ... since its creation, WAITING FOR THE SUN has been committed to a strong ecological approach. In designing our collection of wooden glasses, we wanted to give a strong signal of this commitment. Today, our goal is to take you much further.

Even further, always further ...

Every day, we are driven by the exciting quest for the perfect product for a long time we have worked to design a new material. We unveil it this season. Its name, bio-acetate. Its unique character, completely biodegradable, it recycles itself, without limitation.

Ecological innovation at the heart of our
commitment.

Eco-sostenibile
Bio-degradabile,
Trasparente.

Progettare prodotti rispettosi dell'ambiente combinando design e innovazione, immaginando il futuro... sin dalla sua creazione, Waiting for the sun è stato dedito ad un fermo approccio ecologico. Quando abbiamo progettato la nostra collezione di occhiali in legno, abbiamo voluto dare un segnale forte di questo impegno. Oggi siamo ben oltre quell'obiettivo.

Oltre, e sempre più lontano ...

Poiché l'eccitante ricerca del prodotto perfetto ci spinge ogni giorno, abbiamo lavorato a lungo per progettare un nuovo materiale. Lo sveleremo in questa stagione. Il suo nome, bio-acetato. La sua particolarità: è completamente biodegradabile, e si ricicla all'infinito.

Innovazione ecologica al centro del nostro
impegno.

The packaging had changed.
You will now find a hard case with a
/WAITING FOR THE SUN embossed
logo on the top.
There is a small emoji on the inside.

The cleaning tissue, made from
recycled plastic bottles, is marble
printed.

This case is coming in a recycled
cardboard box with a small booklet
explaining the brand concept.

5

Le packaging a aussi changé.
Nous avons désormais un étui dur
en simili noir avec le logo embossé
sur le dessus.
A l'intérieur, il y a un emoji imprimé.

La chiffonette, fabriquée à base de
bouteilles plastiques recyclées est
avec un imprimé marbre.

Cet étui est livré dans une boîte en
carton recyclé avec un petit livret
explicatif.

10th BIRTHDAY

LIMITED EDITION

Vous savez déjà probablement
que la recette du BIOacétate
que nous utilisons est issue de
notre brevet bois²
Pour nos 10 ans, nous avons
décidé d'inviter nos best-sellers
à se présenter dans leur plus
belle robe organique.

You probably already know that
our BIOacetate is coming from
our patented recipe bois²
For our 10th birthday, we invited
our best seller frames to come
dressed in their best organic
suit.
